

Iteration 2 Instructions

Ray Smith, Josh Duchene, Francesca Tyler, Matthew Duff,
Nathan Lenar, Daniel Owens, Nash Wellington

You should have access to our github repository as a collaborator. The most recent working version of our code is on the most recent commit to the demo2 branch.

The file to run to see some functionality is `src/main/java/Main.java`. The project can be opened in eclipse as a maven project to see the full test suite and run them as well. It is recommended to set a low number of epochs in the TrainNetwork test, or training will take several minutes.
